(*a*) The figures for 1841, as published in *Gazette*, are full of errors which cannot now be corrected, and should therefore be used with great caution.

(*b*) The figures for 1847 include 2240 military, including dependent women and children; also 3739 male convicts on public works.

(*c*) The figures for Persons include 690 "military," which includes dependent women and children, sex not distinguished. The figures for males and females are therefore incomplete—as a result the increase in sexes at the 1861 Census cannot also be ascertained.

NOTE.—The above figures for recorded migration are subject to a correction by adding every quarter 65 males and 25 females to the recorded interstate departures, and 1 per cent. of males, and 4 per cent. of females to the recorded overseas departures. This correction is the average correction found necessary for the intercensal period 1911-1921, and has been decided upon by the Commonwealth Statistician for the period 1921-1931. The corrected figures are given in the table above.

VITAL STATISTICS.

NOTE

IN the following tables, all rates are calculated on revised estimates of the population, based on the provisional returns of the Census of 4th April, 1921, for the population of the whole State and of Municipalities.

No rates depending on the age distribution of the population, such as the index of mortality, are given, because such rates will be largely speculative until further results of the Census are available.

Reference may be made to the Commonwealth Bulletin on Demography for 1920, which may be expected shortly, for more detailed information in respect to Tasmania, on—

Ages, Birth-places, and Occupations of parents of children born.

Birth-places and Occupations of persons dying.

Ages, Birth-places, Occupations, and Conjugal Condition of persons marrying.

In the Commonwealth Bulletin may also be found for the whole of the Commonwealth, but not for Tasmania separately, information in considerable detail respecting—

Mother's age, showing duration of marriage, and previous issue.

Interval between marriage and first birth.

Causes of death classified with occupations.

Duration of marriage, total issue, and average family for persons dying.

NOTE.—The two tables above (and other similar tables), must be read with some caution on account of changes of classification that have taken place before 1910. Since 1910 the classification has been substantially uniform. In the last table, in order to allow for known changes, the classes 89, 91 and 92 are grouped together; as are 151 and 152. For the same reason, but with less certainty, 71 and 104 are grouped together tentatively at the end of the table.

STOCK AND CROPS, 1920-21.

CROPS.

ACREAGE.

THE area under crop was 297,000 acres, which is the largest on record, except in 1915, when the special appeal on account of war conditions led to the record of 333,000 acres. Apart from that the highest acreage recorded was 286,000 in 1910. The area under crop last season was 22,000 acres (or 8 per cent.) greater than the average for the last ten years.

While the area under most crops agreed with the December forecast, in the case of wheat and oats, the actual acreage turned out considerably above the estimate. The excess above the estimate was almost entirely in the North-West. Whereas generally through the island the area under wheat was about twice that of the previous year; in the North-West it averaged four times that of the previous year. In some municipalities such as Latrobe, six acres were grown for every acre in 1919. Many farmers, who usually grew little or nothing, put in a large acreage and under these conditions a forecast based on the experience of the leading growers of the year before is very liable to error. The excess acreage in oats was relatively smaller, and distributed throughout the island.

YIELD.

Crops in 1920-21 have carried out their early promise. The actual returns in yield per acre agree very closely with the forecast. The anticipated and actual yields of the principal crops with the average yield for the last ten years are as follows, in round numbers :—

YIELD PER ACRE.

	Forecast.	Actual.	Decennial Average.
Wheat .....bus.	19	20	18
Oats .....bus.	30	30	26
Peas .....bus.	22	20	18
Potatoes.....tons	2·8	2·8	2·5
Hay .....tons	1·8	1·6	1·4

Peas and hay were somewhat over-estimated, and wheat slightly under-estimated. Oats and potatoes turned out exactly as forecasted. These results show a gratifying response to last year's appeal to farmers for more careful estimates on which to base the forecast.

The yields for all crops were considerably greater than for the previous season, and except for a few minor crops were substantially above the ten years' average. This last season has been the first all-round good season since 1912, though not quite so good as that year.

PRODUCTION.

Owing to the error in the acreage the actual production of wheat and oats has been considerably above the estimate. Peas, both blue and grey, and potatoes have yielded almost exactly what was expected, but hay is about 10 per cent. less than the forecast.

The wheat crop is returned at 566,000 bushels, a figure which agrees closely with that obtained by the Wheat Board. It is more than double the crop of any of the previous three years, though only a quarter of what was grown in 1898.

The oat crop of 1,514,000 bushels is also the largest since the exceptional year 1915, and 50,000 bushels greater than the average for the last ten years.

The potato crop was 89,000 tons, the largest since 1908, and 19,000 tons, or 27 per cent. above the decennial average.

The pea crop gave 321,000 bushels, which was larger than last year in spite of greatly decreased acreage, but about 10 per cent below the average.

Hay production (177,000 tons), shows the greatest increase of any crop. It was easily the largest crop since 1912, and 46 per cent above the average.

Hops yielded 1,864,000 lbs., which was 26 per cent. more than last year, and 7 per cent. above the average.

Apples show a decreased acreage. This is partly due to orchards which have failed and been grubbed, or have been cut up for suburban building, and partly to more accurate returns. The total yield of apples is returned as much the same as last year, (2,360,000 bushels), but the figures for apple yield now and in the past must be taken with some reserve pending further investigation.

The agricultural returns both as to acreage and yield generally, compare very favourably with past years. Unfortunately the crops of greatest importance, which also show the greatest increase of production, namely, hay, potatoes, and oats, have all met with a very bad market.

LIVESTOCK, 1921.

Final figures for livestock in Tasmania for 1921 are now available, based on returns obtained during the second quarter of the year. In the following table the numbers for 1921 are compared with he corresponding numbers for 1920, and with the average for the last ten years :—

	1921.	1920.	Average Ten Years.
Sheep	1,570,832	1,781,425	1,754,569
Horses	39,117	39,452	42,056
Pigs	38,116	35,530	47,853
Milch Cows	63,681	64,073	56,815
Other Cattle	144,521	150,307	143,510

Livestock in Tasmania has made no permanent increase for many years. The number of sheep has been fairly constant since 1847 ; the greatest number recorded since was 2,220,000 in 1852, and the smallest 1,305,000 in 1871. In 12 years only, since 1847, has the number been less than at present. Pigs have not increased permanently since 1861 The greatest number recorded was 81,700 in 1890, and last year was almost the lowest for 60 years. Cattle on the other hand increased up to 1904, and have been fairly steady since, with a low p riod 1914 to 1916. Horses increased up to 44,000 in 1912 and have since gone back somewhat.

Livestock generally have declined from 1920, with the exception of pigs, which have increased by 7 per cent. The most serious falling away has been in sheep, with a decline of 211,000, or about 12 per cent., making the lowest number since 1904. The decline has been general throughout the State, relatively greatest in the North-West, and least in the North-East. The only important sheep municipalities which have fairly kept up their numbers are Hamilton, Fingal, Westbury, Glamorgan, Lilydale and George Town. The greatest decline is in Oatlands, which returns 164,000 sheep against 219,000 last year, a drop of 25 per cent. The relative decline in Deloraine and the further North-West is still greater.

Ewes are returned as 45 per cent. of the total. Figures are not available for comparison with past years in this State, but last year the proportion in N.S.W. was 54 per cent., and in New Zealand 49 per cent. Lambs are returned at 263,000, or 17 per cent. of the total. Last year they were 335,000, or 19 per cent. The average for the last ten years has been 375,000, or over 21 per cent of the total. These figures are an indication both of a bad lambing season and a high price for meat.

There is a decline in cattle of 6200, or about 3 per cent. There is a general tendency throughout the island to smaller figures. Circular Head and Kentish have considerable deficiencies balanced by increases in Table Cape and Emu Bay. The following municipalities have over 10,000 cattle :—Table Cape, Circular Head, Ringarooma, Hamilton and King Island. Dairy cows are returned at 63,700, or about the same as last year. The number in milk has, however, declined by over 6000, or about one-seventh, and the number of dry increased by the same number. This is a rather remarkable result, considering that last autumn was a very much better season for feed than the autumn of 1920. It is, perhaps, to be accounted for by the stock statistics being collected at a somewhat later date this year. In May and June, a few weeks will probably see a large increase in the number of "dry" cows.

About 40 per cent. of dairy cows belong to the North-West, and 24 per cent. to the North-East. Three municipalities stand out as cow-keepers, Table Cape with 6160 cows, Ringarooma and Circular Head, each with 480.

The number of working bullocks for the whole State is returned as 6378, of which about one-half are in the North-West.

Pigs show a very general increase from the very small numbers of 1920. Table Cape and Kentish are the biggest pig-keepers, followed by Deloraine and Circular Head. At the other end, Gormanston acknowledges only one solitary pig.

Of the 38,000 pigs in the State only 6900 are returned as sows over one year. Data are not available for comparison with past years in this respect.

Angora goats number 888, and other goats 739. Hardly any of the angoras are clipped ; it appears that they are kept largely to eat down blackberries.

Horses show little change compared with 1920. In the North Midlands, the numbers show a decline but generally they remain steady. Hobart and Glenorchy both show a substantial increase in horses in spite of the competition of mechanical transport.

NOTE.—The percentage in the last column is designed to give an approximate measure of the proportion of farming and pastoral land, excluding Crown leases and licenses, that is rented from the owner. Share farms are left out as being intermediate in their nature. The figure given is the percentage of rented land to the total made up of rented land, freehold occupation, and Crown land in process of purchase on time payment.

MINERAL PRODUCTION.

The value of Mineral Production as given in the following tables for 1920 and past years is in general the value of the pure metal contents of the ores mined, not the value of the ore when it leaves the mine. It includes, therefore, the value added to the ore by smelting, refining, &c., whether done in Tasmania or other States. The value of smelting, &c., is also counted in industrial production, and is, therefore, improperly duplicated in the total value of production. The extent of the duplication in Tasmania may be roughly estimated at £500,000.

LEGISLATION AFFECTING LABOUR CONDITIONS.

SUMMARISED Contents of Main Parts of Acts (1910 and 1911) in Force.

Headings	Particulars.
Factory.	A factory is defined as a place or structure wherein (*a*) *four* or more persons are employed; (*b*) *one* or more persons of an Asiatic race is employed; (*c*) power (other than horse or hand) is used; (*d*) every bakehouse used and every quarry or clay-pit worked.
Application of Act. Exemptions.	The Act applies to the whole of Tasmania, except— (*a*) Prisons, reformatories, industrial schools, or homes for erring women; (*b*) any building conducted for charitable purposes; (*c*) any building used for the manufacture of dairy produce; (*d*) premises used for pastoral, agricultural, or horticultural purposes; (*e*) ships. The Governor may exempt any factory.
Registration.	Every factory must be registered. No factory may be used until registered. (The present office for registration is "Public Health Department, Hobart.")
Records.	A true record of specified particulars, including the names, work, and wages of each person employed, and the ages of those under 21 years, must be kept by the occupier of each factory. Said particulars must be available to the inspector, and a copy furnished annually to the Chief Inspector.
Inspectors.	Inspectors have the right to enter and examine a factory at all reasonable hours. They may order, once in 14 months, the washing of the interior of every factory.
Cleanliness, Sanitation, and Safety.	Every factory must be kept clean, well ventilated, free from over-crowding, and provided with necessary accommodation for males and females. Doors must be kept free from obstruction, and fire-prevention appliances kept in readiness.
Sleeping-places.	No factory shall be used as a sleeping-place.
Meals.	A meal may not be partaken of where employees are working, or, in certain cases, where employees have been working.
Intervals.	No person shall be employed continuously in a factory for more than five hours without an interval of an hour for a meal.
Bakehouses.	The interior surface of each bakehouse must be washed once every 12 months. Underground bakehouses may not be used.
Child Labour.	No child (*that is, a person under* 14 *years of age*) shall be employed in any factory.
Restriction of Employment in Dangerous Trades of Children and Females.	No *female*, or no *person* under 18 years of age, shall be employed in any factory where . . . (*a*) Silvering of mirrors by mercurial process; (*b*) white-lead making; (*c*) Lead-glazing or pottery; or (*d*) wet spinning is carried on. No female under 18 years of age shall be employed in a glass melting or annealing factory. No *female* under 16 years of age shall be employed in making or finishing bricks, ordinary tiles, or salt. No person under 16 years of age shall be employed in any part of a factory where (*a*) dry grinding in the metal trade; or (*b*) dipping of lucifer matches is carried on. No female or no boy under 16 years of age shall be employed as type-setter in a printing office, (*a*) longer than eight hours in one day; nor (*b*) between the hours of 9 o'clock in the evening and 6 o'clock in the morning.
Sections of Acts Posted Up.	Sections of Acts relating to the restriction of employment of women and children in dangerous trades shall be posted up in a conspicuous place in each factory for the information of employees.
Maximum Hours of Employment of Women and Young Persons.	No young person or woman shall (except in certain specified conditions) be employed in a factory for (*a*) more than 48 hours in one week; (*b*) more than 10 hours in one day; (*c*) later than 9 o'clock in the evening in manufacturing articles; (*d*) after 1 o'clock in the afternoon of one working day in each week. The Minister may suspend the operation of this section. The conditions on which the above hours may be exceeded are:—(*a*) The hours shall not exceed 54 hours in one week; (*b*) the aggregate (above 48 hours) shall not exceed 200 hours in one year; (*c*) detailed particulars of purpose and necessity of work shall be forwarded (within 24 hours) to the Chief Inspector. Time and a quarter rates shall be paid for overtime; and (to those employed after 6 o'clock and not receiving more than 15s. per week) not less than 6d. tea-money shall be paid.
Exemptions of Specified Factories from Maximum Hours of Employment of Women and Young Persons.	During the months of December, January, February, March, and April factories wherein are prepared or manufactured fresh fruit, jam, or other perishable materials are exempt from Section 51 of this Act relating to maximum hours of employment of women and young persons; but *not exempt* from the subsection referring to overtime rates of pay.
Overtime Pay.	Time and a quarter shall be paid for overtime.
Certificates of Birth and Fitness.	Every employee under 16 years of age shall, when required, produce a medical certificate of fitness for employment and a birth certificate to the inspector.
Hours of Women and Young Persons in Shops.	No person under the age of 16 years and no woman shall (except with the consent of the Chief Inspector) work in a shop, (*a*) longer than 52 hours (excluding meal-times) in one week; or, (*b*) longer than nine hours in one day, except on one day a week, when 12 hours' work may be done. In a week in which a public holiday (other than Saturday) occurs, 12 hours a day may be worked on two days of such week if the shop be closed for such holiday. The Chief Inspector may grant permission to work not more than three hours' overtime in any one day, and for not more than 40 such days in one year.
Minimum Wage. FRIENDLY SOCIETIES:

REPORT OF THE STATISTICIAN FOR THE YEAR 1920.

Statistical Department,
Hobart, 2nd November, 1921.

SIR,

In accordance with the provisions of "The Friendly Societies Act, 1888," I have the honour to furnish the following report with respect to the year 1920:—

RETURNS AND INFORMATION.

1. The usual tables disclosing the operations and state of the finances of each district and branch society which furnished returns to this office for the previous year were duly published and distributed on application. A few societies still continue to cause trouble and expense by protracted delay in sending in returns.

MEMBERSHIP.

2. Membership, which was steadily increasing up to 1914, declined during the war, but made a small recovery in 1919 and a rather larger one in 1920. The number of financial members in 1920 was the largest on record, being 126 greater than in 1914. The increase over 1914 is, however, in women and juveniles; the number of adult male members is still below the 1914 figures.

RECEIPTS.

3. Members' contributions and levies show an increase of £1426, and interest, &c., of £1421. But the item of insurance, which is mainly paid under the "Aid to Friendly Societies Act," has now disappeared, and receipts diminish by £8732 on that account. Total receipts are accordingly £92,555, or £6413 less than in 1919. Compared with 1914 (with membership approximately the same in the two years), members' contributions have increased by £6708, and interest by £4969. Members' contributions tended to be larger, not only on account of the increased membership, but also because soldier-members who had been temporarily exempt were contributing again in 1920. On the other hand there was no insurance levy, and the decrease in deaths among members (202 against 276 in 1919) entailed a corresponding decrease in levies for funeral benefits. The rate of interest earned by invested funds was 5·14 per cent., compared with 4·75 per per cent. in 1919 and 3·8 per cent. in 1914. Accumulated funds amount to £280,315, an increase of £9538 in the year. This is about the amount of the pre-war annual increase. During the three years 1915-17 accumulated funds were stationary; but the total war effect on accumulated funds appears to leave them less than £20,000 short of what they would otherwise have been.

SICKNESS AND MORTALITY.

4. Sickness averaged 9·7 days per financial member. This is an improvement on 1919, when influenza raised the rate to 10·3 days per member, but compares badly with all pre-war experience. From 1911 to 1915 the average rate was exactly 8 days per member. The number of deaths per 1000 members was 9·2, against 12·9 in 1919. The high rate in 1919 was partly due to influenza, but more to the number of war-deaths which were accounted for in 1919, although they belonged strictly to previous years. The average rate for six pre-war years 1909-14 was 8·0 per 1000 members, with a maximum of 9·3 in 1913; so that it cannot yet be said definitely that after-effects of war have caused a higher death-rate, though it appears to have increased the incidence to sickness.

EXPENDITURE.

5. The expenditure has fallen from £89,562 in 1919 to £82,828. The decrease, £6734, is £321 greater than the fall in revenue. The principal decrease is in the items sick pay and funeral allowances, the former showing a falling off of £4090 and the latter of £5600. The influenza epidemic swelled both items to abnormal dimensions in 1919. Disbursements for medical expenses amounted to £21,609, or £1920 more than in the previous year. The increase was due largely to a number of members being replaced on the medical list who, during the war, were off it.

The average amount paid in funeral benefits was (for adult males) £72 12s. 4d., as compared with £75 5s. 8d. in the previous year. The decrease is due to a decline in the number of deaths in those societies paying a higher scale of allowances, and an increase in those paying on a lower scale.

Compared with the pre-war period (1911–15), expenditure per financial member increased as follows:—

		s.	d.		s.	d.		
Medical expenses	from	17	10	to	20	3,	or 14	per cent.
Sick pay	„	18	11	„	22	6	„ 19	„

Management	„	10	11	„	12	10	„ 18	„

while members' contributions increased only from—

s.	d.		s.	d.
58	6	to	64	4, or 10 per cent.

The balance of total receipts over expenditure has declined, however, only from 9s. 8d. per head to 9s. 1d. per head. This relatively favourable position is due to the increased earning power of accumulated funds.

QUINQUENNIAL VALUATION.

6. In my last report I pointed out that an actuarial investigation into the financial position of the friendly societies was overdue, and recommended that provision should be made for one as soon as possible. You, sir, approved the recommendation and authorised the necessary expenditure, and arrangements have now been completed for Mr. A. M. Laughton, the Government Statist of Victoria, to undertake the work, which will be begun almost immediately, and take about 12 months to complete. Mr. Laughton's wide experience with the friendly societies of Victoria will, I believe, make his report of great value to the societies here.

CONCLUSION.

7. In my last report I made various comments and suggestions as to funeral benefits, amount of sick pay, and life insurance. I have since had the advantage of a personal conference on these matters with leading representatives of the friendly societies, and have collected other data bearing on these matters. But as much will depend on the result of the investigation above mentioned, I believe it will be wiser not to pursue these questions further until the investigation is completed.

Detailed tables, 1 to 6, are appended.

Government Statistician.

The Hon. the Treasurer.
